

Organic fertilizer solution Nordfert HumiCare 22

Mass percent composition (%):

Total nitrogen (N)	3
Ureic nitrogen (NH ₂ -N)	3
Total potassium oxide (K ₂ O), water soluble	4
Total humic acid	18
Total fulvic acid	4

Density: 1.2 g/ml

Liquid: N-0-K+organic matter

Volume percent composition (%):

Total nitrogen (N)	3,6
Ureic nitrogen (NH ₂ -N)	3,6
Total potassium oxide (K ₂ O), water soluble	4,8
Total humic acid	22
Total fulvic acid	4,8

Date of manufacture: 00.00.0000

Expiration date: 00.00.0000

Registration number: 000000000

Safety and storage measures

To maintain the safety of the product quality packaging of fertilizers should be stored in a cool, dry, indoor place at temperature between +10 and +25°C, apart from the food and drugs. Avoid storage near flammable gases, electric motors and internal combustion engines, instruments, and chemicals. Do not leave empty packages in places easily accessible to children or pets. The usual precautions for handling fertilizers should be observed. Wash hands and face after handling the product. In case of contact with eyes, flush with water. After contact with skin, wash with water and soap if necessary. If ingested, rinse mouth and drink plenty of water. Take steps to control product discharge into the environment. Notify appropriate authorities if required and arrange for the recovery of spilled material. Methods for Clean-up: Dilute and wash away with large amounts of water. Dispose of in accordance with local regulation.

Advantages:

- Soils may contain excessive elements, heavy metals and toxic chemicals. Humic acid helps buffer the effects of these substances, especially sodium, to lessen their stress effect on plants.
- Humic acid-based liquid soil corrector designed for use through irrigation systems.
- Increases nutrient content of soil, soil fertility, moisture holding capacity and productivity.
- Stimulates soil microorganisms with more efficient breakdown of organic matter.
- Improves root development for better fertilizer uptake.
- Improves germination and viability of seeds.
- Stimulates beneficial microorganisms, which can improve long-term soil pH.

Application:

Apply depending on the plant vegetative state and soil characteristics. Do not mix with acid reaction products. Shake gallon well before use.

Plants	Dosage per application for irrigation (l/ha)
Fruit trees	10-20
Horticulture	10-20
Ornamentals	10-15
Nurseries	0,5-1 L/1000 L of water
<i>*Dosage and applications depend on soil type and farmer's practice.</i>
