

Copper fertilizer solution NordFert Micro Cu 55 g/l

Mass percent composition (%):

Total nitrogen (N)	2
Nitric nitrogen (NO ₃ -N)	2

Microelements:

Copper (Cu), water soluble	4,5
----------------------------	-----

Density: 1.24 g/ml

Volume percent composition (%):

Total nitrogen (N)	2,5
Nitric nitrogen (NO ₃ -N)	2,5

Microelements:

Copper (Cu), water soluble	5,5
----------------------------	-----

Date of manufacture: 00.00.0000
Expiration date: 00.00.0000
Registration number: 00000000

Safety and storage measures

To maintain the safety of the product quality packaging of fertilizers should be stored in a cool, dry, indoor place at temperature between +10 and +25°C, apart from the food and drugs. Avoid storage near flammable gases, electric motors and internal combustion engines, instruments, and chemicals. Do not leave empty packages in places easily accessible to children or pets. The usual precautions for handling fertilizers should be observed. Wash hands and face after handling the product. In case of contact with eyes, flush with water. After contact with skin, wash with water and soap if necessary. If ingested, rinse mouth and drink plenty of water. Take steps to control product discharge into the environment. Notify appropriate authorities if required and arrange for the recovery of spilled material. Methods for Clean-up: Dilute and wash away with large amounts of water. Dispose of in accordance with local regulation.

Advantages:

- Promotes development of necessary growth hormones.
- Improves photosynthesis and activates enzymes.
- Improves the taste of the fruit, shelf life and ability to store sugars.
- Improves carbohydrate and protein metabolism.
- Increases tolerance to cold, drought, diseases and exposure to pesticides.
- Generates lignin in plant cell walls (structural strength cells and plants).

Application:

Suitable for all fertigation systems and foliar application. Especially recommended in case of weak development or nutrient deficiency symptoms. Use only in case of need. Do not exceed recommended dosages. Can be mixed with plant protection. A preliminary mixing of fertilizer with plant protection in a small cup is recommended. Shake gallon well before use.

Crop	Growth stage	Dosage (l/ha)
Grains	Beginning of tillering; Tillering; Stem elongation; Beginning of heading; The end of flowering.	1-2
Oilseed rape, linen	Rosette formation; Beginning of spring vegetation; Beginning of stem elongation; Green bud phase; Beginning of flowering.	1-2
Corn	3-4 leaf stage; 6-10 leaf stage; Before tasselling.	1-2
Legumes	Vegetative growth; Before flowering; After flowering.	1-2
Potato	Complete shooting; Before flowering; Maturation.	1-2
Beet	4-10 leaf phase; 14 days later; Before closing within the rows.	1-2
Recommended amount of water: field crops – 150-300 l/ha; greenhouse and garden – 150-300 l/ha		

Net: 20 l (24,8 kg)
